Pre-Requisites & Installation

Prior to installation of Virtual Stationery you should make sure you do the following:

- 1) The customer must have a suitable Windows PC available. See system specifications below.
- 2) All output devices must support PostScript
- 3) The customer must provide suitable PDFs. PDFs should not contain crop marks, nor should they be password protected or protected in any way.
- 4) The customer should be made aware that during installation a reboot of the PC/Server will be required
- 5) Virtual Stationery web interface works using port 8080 OR port 8181, you should check to make sure that at least one of these ports are available (not used by other applications nor blocked by firewalls)
- 6) Software downloading and Activation requires an internet connection, so you should make sure there is an open internet connection available on the PC/Server being used

System requirements

Minimum Requirements

- Pentium 4 Class CPU
- 1 GB RAM
- 5 GB Free Hard Drive storage space
- 1024x768 16bit Color Graphics Adaptor
- Windows 2000 SP4
